

# SMARTACTIVE MODERATE PORTFOLIO | APRIL 2018

## ABOUT THE PORTFOLIO

The SmartActive Moderate Fund is targeted at institutional clients seeking a medium risk market-linked portfolio with a dual focus on both strong returns and capital preservation. The Fund maintains a strategic 53% allocation to equities (domestic and international), with the balance invested in fixed interest instruments and alternative asset classes. 22% of the Fund is invested internationally. The portfolio operates on a multi-manager basis, using both actively and passively managed underlying portfolios, with the majority of the portfolios actively managed with the objective to outperform their respective benchmarks. A tactical asset allocation overlay is applied. This mandate is ideally suited as a low to medium risk investment for retirement funds, as well as a medium risk investment option for funds offering their members investment choice options. The objective of the fund is to outperform CPI + 4% per annum over a time horizon of 3 to 5 years.

## MONTHLY ECONOMIC COMMENTARY

April started with another round of technology company and trade-war woes, with the S&P 500 tumbling below its 200-day moving average which is a key measure of momentum.

China retaliated against 25% tariffs proposed on Chinese goods by the US worth US\$50 billion by targeting high-value American exports, from airplanes to soybeans. In a further tit-for-tat move Trump raised the value of tariffs on Chinese goods to US\$100 billion. Although neither takes effect immediately, the dollar weakened and global stock markets fell. Markets recovered only after the US expressed willingness to negotiate.

Within a week Trump upset the markets again with a set of sanctions on Russia targeting individuals and entities connected to President Vladimir Putin. This immediately boosted commodity prices, in particular, aluminium and palladium.

On a positive note, Wall Street enjoyed a blockbuster earnings season thanks to US tax reforms, a weak US dollar and higher oil prices all playing key roles. The markets were also buoyed by optimism as North and South Korea held their first summit in over a decade.

On the economic front the US economy grew by an above-expectation annualised 2.3% in the first quarter, while consumer inflation, excluding energy and food, came in at 2.1% year-on-year in March. With inflation building up, the US Fed expects to increase interest rates three times in 2018 and 2019.

China's GDP rose by 6.8% from a year earlier in the first quarter, beating expectations. However, flagging exports and factory output may prove a drag in the coming months.

In South Africa, headline inflation came in at 3.8% year-on-year for the first quarter, driven by a decline in fuel and food prices. The IMF has revised its growth forecasts upwards to 1.5% in 2018 and 1.7% in 2019 due to the positive political changes, but warned that structural bottlenecks remain a concern.

The FTSE/JSE SWIX Index rose by 4.3%, with Resources up 9.4%, Industrials 5.8% and Financials 3.0%. The JSE All Bond Index fell by 0.7%, while the Rand weakened by 5.4% relative to the US dollar.

## STRATEGIC BENCHMARK

The strategic benchmark of the moderate fund is 36.1% SWIX, 2.5% SA Listed Property, 19% ALBI, 10.2% STeFI, 10% CPI, 15.9% MSCI All Country Index, 5.3% Barclays Global Aggregate Bond Index, 1% FTSE All Africa ex SA 30.

\*Returns for periods greater than one year have been annualised. Returns prior to inception are simulated returns based on reasonable assumptions using similar strategies managed by Sygnia.

## RISK STATISTICS

	FUND	BENCHMARK
Standard Deviation	6.0%	5.3%
Downside Deviation	2.8%	2.2%
% Positive Months	71.7%	68.3%
% Negative Months	28.3%	31.7%
Average Positive Month	1.7%	1.7%
Average Negative Month	-1.1%	-0.9%
Average Return	0.9%	0.9%
Best Month	4.7%	4.2%
Worst Month	-2.5%	-2.7%
Largest Drawdown	-4.7%	-3.0%

## GLOSSARY

### Standard Deviation

It is a statistical measure reflecting the variability of returns. The higher the number, the less predictable the returns can be expected to be in the future.

### Downside Deviation

A similar measure to the standard deviation except that it only considers months in which there are negative returns.

### Maximum Drawdown

Calculates the worst historical loss in value from previous peak to subsequent trough.
